It is strange that men of broad views and much learning will be unprepared with details wherein their work is vitally interested. Recently a Guthrie minister, one widely known as an edu-cator and who is likewise a physician of note, had occasion to use the terms of note, had occasion to use the terms of million, billion and quadrillion. He confessed to his audience that as a truthful person he could not illustrate the wondrous numbers as he should; that he had no idea whether he could carry a million dollars in twenty dol-tar bills in a bushel measure, or in his vercont pocket, or whether it would require a wagen and four horses a haul that much money from his domicile to the bank. And yet he is on our calling list and we have always stood ready to tell him how to preach, when to preach and what to say that he might best fearner his flock properly. The man is not vain; at least McAlester News Capital. no more than the average man who has been of use in the world and made more of his opportunities than many, and yet nothing short of a stubborn ambition to solve heavy, important questions without going to a standard authority kept this man from coming assiezed of the sought-for understanding before the sermon was lellvered. He also took the precaution to save her prodict and set forty of her eggs under three other hens, she refusing to st p laying so long as the bell rang. The eggs were hatched and out of them he secured 27 pullets. When they were old enough to help the parent hen Mr ushem got another dinner bell and bod, it used at ten, twelve and turee the same chime.
